WHO ARE WE?

Trutek Fasteners is a part of an international holding group that includes production and trading companies operating in all parts of the world. Its distribution activity in Europe began in the United Kingdom in January 2002. Our company specialises in the production of top quality fastening systems for construction and industry. In our wide range, you will find both traditional products, used for many years in construction industry, and innovative, technologically advanced solutions that guarantee the highest level of safety, as well as easy and prompt application.

TOP QUALITY OF PRODUCTS - TECHNICAL APPROVALS, CERTIFICATES AND TESTS

Our products are subject to strict and demanding quality control that ensures the highest quality of the products and complete safety of their use. This is confirmed by numerous certificates and technical approvals.

FAST AND COMPLETE DELIVERIES

- Stock on hand. Advanced SAP computer system enables us to manage warehouse stock accurately and prevent product shortage.
 - Prompt order execution. Orders from our Customers, regardless of the way of their submission, are immediately passed on for execution, so we guarantee delivery within 24 hours from ordering.
 - Complete delivery information. The integration of our computer system with the shipment system of the forwarding company makes it possible to track the process of shipment online and predict the time of delivery.
 - Delivery completeness. The process of the execution of orders involves checking mechanisms that provide multi-level inspection of delivery completeness, thus limiting possible mistakes.

TRAINING

Comprehensive program of trainings for our Commercial Partners is aimed to the best preparation of their personnel to serve Customers from the construction industry. The training program includes the following issues:

- Product training - it gives the opportunity to get fully familiar with our products, their technical characteristics and application in construction side conditions.
 - Technical training – it includes expertise in the range of materials science, physical and chemical processes that occur during anchoring and product documentation required on construction sites, such as technical approvals, certificates and declarations of conformity.

TECHNICAL ASSISTANCE, ADVISING ON CONSTRUCTION SITES

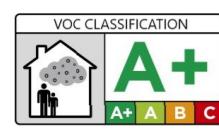

Technical assistance is provided by a group of experts whose mission is to support design engineers and constructors in cases of innovative and difficult construction projects, as well as the optimum and complex choice of fastenings for typical applications that are common for constructions sites:

- telephone info-line technical support,
 - choice of fastenings for a given project,
 - anchors choice reports,
 - materials for design engineers,
 - anchors choice program,
 - construction site test and presentations

ORDER PORTAL - ONLINE ORDERING

This is easy and fast way for purchasing at any time of the day and night. All the orders placed on the Internet retain all commercial conditions, and the interactive interface of information exchange gives the opportunity to agree non-standard conditions of product delivery.

- information on the availability of product of interest,
 - information on the order value,
 - information on the order processing progress;
 - invoice prior to product delivery,
 - special offers for web portal users,
 - historical data review,
 - waybill number, enabling the Customer to track the process of goods delivery

DesignFiX®

The Benchmark for Anchor Design
Become a Real Anchor Professional

DesignFiX is an all-purpose anchor design program for manufacturers of fasteners for free distribution to their clients such as engineers, planners or craftsmen. By using the software, the clients can design mechanical and chemical heavy duty anchors under static loads and under the influence of earthquake.

Now available:
Design of post-installed rebar connections in reinforced concrete.

TCM 300/420 M PRO - Polyester

- Suitable for medium loads for non-critical applications.
- Fast working times for early loading in time sensitive applications.
- No styrene allows for use indoors and in enclosed spaces.
- Use in damp & wet environments and fixing holes.
- Extremely versatile in masonry, hollow, aerated concrete.
- Crack and gap filling repairs in concrete vertical or horizontal.
- 10:1 Resin available in a variety of cartridge types.

Pure Epoxy - 3:1 & 1:1

- Suitable for high loads featuring large diameters and deep embedment.
- Longer working times make it suitable for large holes, and high temperatures.
- No shrinkage, good for large diameter fixings.
- Use in wet or flooded environments and fixing holes, or underwater.
- High durability, resistance to chemicals.
- Used for diamond drilled holes.
- Solvent free resin.
- Fixings in concrete, wood, or other high strength materials.
